Project description	<p>The SAHBIO CARBONO project conserves over 200,000 hectares of naturally flooded savannas and forests in the Colombian Orinoquía, with an initial phase covering 143,973.56 hectares. It focuses on carbon retention through conservation strategies, including ecosystem characterization, carbon stock monitoring, and sustainable land use with 124 stakeholders. Activities include training in climate adaptation, carbon monitoring, ecosystem management, and regulatory compliance. A comprehensive conservation framework integrates landscape management, sustainable agriculture, and fire prevention. The project ensures ecosystem conservation through patrolling and biodiversity conservation, contributing to SDGs 6, 13, and 15.</p>

Location	The project is in the Arauca and Casanare departments, specifically in the municipalities of Arauca, Cravo Norte, Tame, Hato Corozal, and Paz de Ariporo, which are part of the Orinoquia.
