Type of Project	Renewable Energy
Project description	The Andes Solar IV photovoltaic power plant with BESS is a Greenfield solar PV power plant equipped with a battery energy storage system. The technology used in this project is environmentally safe and sound solar photovoltaic panels sourced from a certified and respected supplier. The manufacturer will transfer to the Host Party its knowhow by means of training the power plant staff during the construction, commissioning, and operation of the project activity.

Location	The project will be located in Chile in the Province and Region of Antofagasta, at 2,800 m above the sea level. This area is outside the city limits defined by the Municipal Regulator Plan of Antofagasta, so it is classified as a rural area. There are no communities nearby the project site area.
