Sector	Agriculture, forestry and other land uses (AFOLU)
Type of Project	Reforestation
Project description	The project integrates the forest carbon component of the Commercial Reforestation Program - PRC, with more than 3,000 hectares of associative commercial reforestation in 6 municipalities of Magdalena. The PRC was born in the year 2000 led by CORMAGDALENA, its objective to counteract the erosion of the banks of the Magdalena River. Reforestation was carried out on cattle farms, combining cattle and forestry activities, seeking to diversify land use in areas converted to extensive cattle ranching in the Magdalena Bajo area and undertaking actions to give way to forestry development in the region.

Location	The area project is located in the Caribbean region of Colombia, North-East of the country, in the lower part of the Magdalena River basin, called Magdalena Bajo seco. It includes 6 municipalities, all located in the CORMAGDALENA jurisdiction: El Piñón, Zapayán, Tenerife, Pedraza, Plato and Santa Bárbara de Pinto (Department of Magdalena). The nucleus stretches between 9°23'22" and 10°28'19" of latitude North, and between 74°20'39" and 74°56'60" of longitude West.
