<p>Project description</p>	<p>Proyecto Forestal Alcaraván Orinoquía is an initiative of private participants brought together by CO2CERO SAS with a total area of 1,100.81 hectares. Its objective consists in removing greenhouse gases (GHG) through 1.094,43 eligible hectares of forest plantations in the Colombian Orinoquía, for twenty (20) years - starting on 11/04/2018, the date in which reforestation activities, management, and increase of carbon reserves began. The Forestry Project is in the Meta and Vichada departments. CO2CERO SAS oversees the project, including eight (8) project participants recognized as timber forest producers. Its livelihood will be based on the establishment, maintenance, and strengthening of forest plantation coverage, which will improve the socioeconomic and environmental perspective through the commercialization of wood products for the industrial sector. They will remove GHG emissions in the atmosphere, generating a sense of belonging over their property planted and natural resources.</p>
