| Sector          | Agriculture, forestry and other land uses (AFOLU)  |
| Type of Project | Reduced emissions from deforestation & degradation |

|                       |   |
|-----------------------|---|
| Project description   | The Lomas de Nogales Project is located in the department of La Caldera in the province of Salta. The owner of the domain is Lomas de Nogales S.A. and the technical managers are the environmental consulting firm EFS SRL. The project area has about 5.407 hectares, where activities are carried out, such as coniferous forestry on approximately 100 hectares and extensive livestock farming. These activities are carried out by stall holders who are located within the project area. The study area is covered by native forest belonging to the ecoregion of the Argentine Northwest corresponding to the Yungas. This ecosystem is threatened by degradation processes due to the advance of the agricultural frontier and by deforestation processes due to the presence of woody species of commercial interest. One of the main objectives of this project is to obtain the maximum amount of CO2 emissions avoided. To comply with it, it is expected to conserve the hectares of native forest present and promote. |
| Location              | El proyecto está ubicada en el Departamento La Caldera en la provincia de Salta, Argentina  |
| Project participants  | Consultora EFS SRL Puesteros locales  |
| Special category      |   |
| ODS                   | Goal 8: Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all, Goal 13: Take urgent action to combat climate change and its impacts, Goal 15: Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss   |
| Quantification period | 2019-01-01 To 2049-01-04  |
| Methodology           | BCR0002_Quantification of GHG Emission Reductions. REDD+ Projects   |

|  |                   |
|--|-------------------|
| Estimated amount of GHG reductions / removals (ton CO2e) | 0.00              |
| Project ID   | BCR-AR-365-14-001 |
| Inscription date (dd/mm/aaaa)                            | 18/04/2024        |

|                                  |   |                            |
|----------------------------------|---|----------------------------|
| Verification Period (dd/mm/aaaa) | Verified GHG emission reductions or removals (t CO2e) | Conformity Assessment Body |
|----------------------------------|---|----------------------------|
